An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 11, line 7, "an" has been changed to --a--; and

Line 15, "complimentary" has been changed to --complementary--.

These changes are made to correct typographical errors.

The following is an examiner's statement of reasons for allowance: Näslund (US 4656697, figure 1) is exemplary of the closest art of record and fails to teach the subject matter of claim 11, lines 11-13 as reproduced below:

**an anti-tampering means comprising a first tongue at the second end of the male element and a second tongue at the second end of the female element;**

and line 17 as reproduced below:

**a cutting or tearing means on a top of the female element,**

The clip of Näslund has a locking device at the first end of the male and female elements, not an anti-tampering device. The locking device of Näslund is reusable and fails to have any structure that would indicate any tampering with the clip as the anti-tampering means is positively claimed and exists as the securement together of the two tongues by being welded together and its equivalent and the requirement for destructive disengagement and there is no

structure on the clip of Näslund that functions to tear or cut. These structures claimed by applicant provide enhancement in structure and functional capabilities over and above those achievable by Näslund and there is no suggestion in the art of record to modify the clip of Näslund to have such structures in combination with the other claimed limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The drawings received March 29, 2007 have been approved.

The substitute specification received March 29, 2007 has been approved for entry.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James R. Brittain whose telephone number is (571) 272-7065.
